

AMBERCLENS – Surface 95

The efficient cleaner for modern office and telecommunication equipment.

The cleaning of terminals, PC- and screen housings and copiers can give electrical / mechanical breakdowns when using small quantities of waterbased cleaners. SURFACE 95 is water-free and prevents short circuits and corrosion. Furthermore, SURFACE 95 removes heavy dirt and gives a long lasting shine.

Application

- Office equipment, such as PC housings, keyboards, telephone equipment, windows, desks, furniture, housings of printers, scanners etc.
- In Communication and meeting rooms

How to use

- Spray SURFACE 95 from 20-30 cm onto the surface, allow to work for a short time and wipe with a clean cloth.
- The product contains flammable solvents, therefore keep away from ignition sources when using. Ensure proper ventilation is available

Key Features

- A highly active cleaning fluid.
- Contains polishing agents, which give long lasting shine
- Makes treated surfaces look clean and new
- Has antistatic properties
- Water free
