

GLASS CLEANER – Screen TFT

For quick and easy cleaning of all screens.

Technical glass cleaner, which has been specially developed to meet the requirements of computer monitor and television users. A dirt-free monitor is a basic prerequisite in this field for pleasant, easy work in an ergonomically organised workplace. Because of the inevitable build-up of static electricity, every monitor screen attracts dirt and, from time to time, requires thorough, gentle, streak-free cleaning.

Application

- SCREEN TFT is used to clean TFT, LCD and LED screens on: PC monitors, notebooks & laptops, smartphones, camcorders and navigation systems
- Also applicable on: scanners & copy machines

How to use

- Shake the aerosol well before use.
- Spray a thin layer on the contamination and wipe off with a lint free cloth.
- For heavy contaminations, the active foam can be allowed a longer time to act.
- The product must NOT come into the inner electrical parts of the cleaned device. Spray the product on the lint free cloth and wipe of the surface.

Part #: 28200153

Key Features

Cleaning of sensitive surfaces without stripes.

Works on most common contaminations: fingerprints, nicotine.

Stable foam during an extended period.

Does not drip off from vertical surfaces.

Product Data

Appearance	white, stable foam
