

## ISOPROPYL ALCOHOL – Kontakt IPA

Universal cleaner for electronics, fine mechanics and optics.

99,7 % pure isopropanol in a spray can. The ready to hand aerosol enables a pinpointed, clean application. Ideal as multi-purpose cleaner to improve the performance and reliability of electrical and electronic equipment.

### Application

- KONTAKT IPA is being used as universal cleaner for electrical, fine mechanical and optical equipment. Applications are for example :
- Above all, the cleaning of optical lenses, mirrors or high glossy surfaces
- Cleaning of video and audio heads
- Cleaning of moving parts, rubber rollers or small gears

### How to use

- Use KONTAKT IPA with precision.
- Spray hard-to-reach areas upside down.
- Avoid direct spraying on video or audio heads.
- Use soaked cleaning substances instead.
- Take caution with flammability and energized equipment.

Part #: 28200159

### Key Features

- Extremely pure.
- Non-staining on glass and metals.
- Extension tube for hard-to-reach areas.
- Trouble free storage.
- Less soiling.
- Evaporates completely, leaving no residue.

### Product Data

<b>Appearance</b>	colourless, clear liquid
<b>Density at 20 °C</b>	0,79 g/cm <sup>3</sup>
<b>Flashpoint</b>	12 °C
<b>Evaporation rate (ether = 1)</b>	at least 99,7%
<b>Water content</b>	<0,2%
<b>Aerosol</b>	200 ml 400 ml
<b>Canister</b>	1 L
